The Witchcraft: To begin with, you must learn how to use the tools given to you by your fairy godmother to create potions. Her familiar, Eurydice, is a hungry, mischievous eye which she communicates with using a tangle of yarn (as seen in the still below). Basket: The Witchcraft is held in a basket, and you'll use it to steer your eyeball around the level. It can be swung from side to side, up and down, as well as forwards and backwards. You can "bend" the basket in unexpected ways by pressing forward and backward simultaneously. Dash: Your dash is a powerful weapon, and it can be used to bounce off of enemies, stop, and use to your advantage. Press (F4) to activate it, and every time you press it, it will increase in strength. It also has a limited life, and when it's depleted, you'll stop flying and run. Note that pressing up against an enemy won't cause you to stop, so it's possible to dash through enemies by taking advantage of their thickness. The weapon wheel: Your weapon wheel is a tool which allows you to carry an array of potions that can be used to inflict various status effects on enemies (such as slowing them down, stunning them, and so on). The wheel can be rotated by holding (F4), and there are four tiers to

it: heavy, medium, light and charm. The bag: The Witchcraft's eye can be used to grab enemy potions. You'll pull up an inventory screen by pressing (F7). There's a limit of three potions at a time, and the type of potions in the bag is limited by the tier of the weapon wheel. The body: Not all potion recipes take the same amount of ingredients. The Witchcraft's body can be used to add more potions to the bag, or to acquire ingredients. It can be used by pressing (F8). Since the body can only carry a maximum of two potions, you'll have to use it wisely. Witchcrafts: You can combine the Witchcraft's body with a potion of the same tier to create a witch's special ability, which can be used at any time while the Witchcraft is in the air. By combining the Witchcraft's body with a potion, the Witchcraft's ability can be altered: The caster's ability will always be the one granted by the lowest tier potion

State of the art analysis and physics engine, which allows for amazingly detailed, real-life locomotive modelling. All features that are usually available only in reality-based engines Loco dynamics - which ensures realistic locomotion. The engine follows the laws of physics by which it is driven. Each movement of the locomotive results in rotational movement of the tires (axle) and of all other parts of the loco, starting with the four wheels. Both, loco and carriages are controlled by a software, based on well-known vehicle models. This level of performance is combined with individually programmed motion, applied to the engines and the coaches. This results in an unparalleled visual and audio presentation. **"In the spring, I went out to look for sign," Willie said. He smiled wide. He had a gleam in his eye, his brown eyes and, for a moment, the gloom of morning. "And I saw a fox. She was a sly fox—like she was grinning. She was all black. She was beautiful, I tell you. And tall. And I heard her call 'eleven' from a tree. This is the one I saw. This is the fox I saw." Willie pointed up at a tree in the distance. His outstretched arm showed the tip of an arrow, a white heart, and his fingers to me. A white in the tree. How can a fox speak? I wondered. And how can he tell the year, by the tips of an oak tree? "Eleven," he said. "She was calling in April. And the pines, cut-figure, she was reading. She was probably reading the letters to me. I was the one her heart ached for." I was Willie's daughter, Jackie, but I did not feel like his. I felt like a fox observing, a fox tree, a fox conjured. And if I could speak, I would call out to Willie. I would say a swift, intelligent thing, that he might hear. Here, now, at the Beech Ridge Animal Shelter in the early morning light. Listen, I would say. I had just found a little section of the long, splintered pole of a split-rail fence. I picked up the fence board with my white hands. Smacked it against a trembling branch. Then again. My hands were shaking from anger. I had never wanted anything so badly. I had never wanted anything I couldn't have. When I grew up, I would understand that they had lost interest in foxes, not just Marty (Willie's son and my father) but also Willie and myself, both the foxes. I felt it immediately. I flew into action: I needed to save a fox. It wasn't that they were ignoring us, ignoring the foxes. We had been seen. We**
