I have a python script that requires a file to exist. Currently I am doing: if not os.path.exists() But I want it to check if this file is shared by another user, or if another user has access to this file on a network share. Is this possible? A: Someone else on the network... I don't know Python very well, but you might be able to do a network search or search for share names. In C#: var a = Network.Network.GetFileShares(); var s = a.FirstOrDefault(i => i.Data.First().Name == "share name"); What you'd want to be checking is to see if a particular user has access to the share.
